Maximum durability  
SuperMAX DuoMAX

Look for the DuoMax™ and SuperMax™ symbols on choice patterns for MAXimum durability. DuoMax™ and SuperMax™ liners are designed to address the harsh weather cycles of freezing and thawing in the North and strong ultra-violet rays in the South that can adversely affect a pool's surface. We take the additional thickness of the material and put it where it will provide MAXimum toughness so you can enjoy MAXimum carefree enjoyment.
